

Stellar Command - Quick Reference

STELLAR COMMAND

Round Sequence

1. **COMMAND PHASE:** Pass First Player marker and gain **(S)+2** Command Chips. Stage one Aero Group for each Fleet or Light Carrier. Stage two Aero Groups on each Aerofield.
2. **ACTION PHASE:** Alternate spending Command Chips to perform actions, one at a time.

Actions

- **MOVE:** Move a friendly unit. Each unit may move only once per round.
Stacks: 8"
Revealed miniatures: 4".
- **AERO ACTION:** Target an enemy unit with an Aero Action.
- **FOG OF WAR:** Select a Revealed Task Force that was not revealed this round.
Place a new Base Chip within 2" and remove the miniature.
Mix the Task Force's chip with D3 blank chips and form a new Stack.

Gun Battle

If two opposing Revealed Task Forces make Visual Contact (within 2"), a Gun Battle ensues.

1. **GATHER GUNS DICE:** Both players gather a number of D6 equal to the total Guns value of their Task Force.
2. **RESOLVE GUNS DICE:** Both roll Guns dice.
4-5: Unconfirmed Hit, assigned by the owner of the target.
6: Confirmed Hit, assigned by the player that rolled them. Each hit sinks a ship (unless Armoured).
3. **VICTOR CONSOLIDATES:** Player who inflicts the most total hits is the victor and they may make a free Move action, during which they may ignore the losing TF but must end outside of Visual Range of all enemy units.

Aero Action

Strike Range is **18"**. Recon Range is **36"**.

1. **BRIEFING STEP:** Secretly select one friendly air-enabled Task Force or Aerofield. Declare target unit in range. Optionally commit a staged Aero Group card. Declare unit in range.
2. **RECON STEP:** Roll 2D6. ≤ 8 , look at the lower of the two dice rolled: this is the number of chips you may peek at. Discard your committed Aero Group card to re-roll.
Shuffle the enemy chips, look at #chips = lower of the two dice.
May reveal or return TFs or Blank Chips found. If you Reveal a TF, place it within 2"/Visual Range of the stack. Must reveal Gambits. Shuffle and replace.
3. **DECLARE STRIKE STEP:** Reveal a black committed Aero Group card to launch a Strike against any target Revealed Task Force in Strike Range. Amass Strike dice on that black card = Strike value of TF it comes from. Can't place more Strike dice on a given Aero Group card than the current Aerospace Craft value of the Task Force it originates from. If no Strike, skip to Debriefing
4. **INTERCEPTION STEP:** Defender may reveal red Aero Group cards from the Strike Target and/or any friendly Task Forces within **8"** of the target to roll D6 equal to combined CAP values of participating TFs. Each **5+** discards an incoming Strike Die.
5. **AA STEP:** Defender rolls D6 equal to the AA value of the Strike Target. Each **6+** discards an incoming Strike Die.
6. **STRIKE STEP:** Roll remaining Strike dice. **4 or 5:** Unconfirmed Hit, assigned by the owner of the Strike Target. **6:** Confirmed Hit, assigned by the player that rolled them. Must be assigned to ships in Strike Target. Each hit sinks a ship (unless Armoured).
7. **DEBRIEFING STEP:** Revealed Aero Group cards are discarded. Hidden Aero Group cards returned to their TFs, and may be used again this round.

GAMBITS

Add **(S)** gambits at random to your pool of chips. Reveal on Visual Contact / Recon Action.

1. **UNEXPECTED APPROACH VECTOR:** Owner selects one enemy Stack and places it anywhere within **18"** of the Stack this Gambit was found in. Then discard this Gambit.
2. **RADIO CHATTER:** Owner selects one enemy Stack and reveals it in full. Then discard this Gambit.
3. **MISCALCULATION:** Owner may select any/all of their units within **6"** of the Stack this Gambit was found in and move those units up to **6"**. Then discard this Gambit.
4. **CODES BROKEN:** Owner receives one Command Chip and their opponent must discard one Command Chip. Then discard this Gambit.
5. **MISIDENTIFIED!:** Owner selects any two of their own units and swaps their positions. Then discard this Gambit.
6. **CRITICAL DAMAGE:** Owner takes this chip. They may discard it during an Aero Action to re-roll any of their Strike dice.
7. **MINES:** Owner places it into play. For the rest of the game, enemy Task Forces within **3"** of this chip suffer Confirmed Hits on **5 or 6** instead of just **6** during Gun Battles or Strikes.
8. **UNFORESEEN DELAY:** Owner selects one enemy unit and moves it **6"** in any direction, then discards this Gambit.
9. **HEROIC DAMAGE CONTROL:** Owner selects one sunk ship in any in-play Task Force and 'unsinks' it. Discard the Gambit.

Ship & Squadron Classes

CLASS	COST	ROLE	SPECIAL RULES
Fleet Carrier	25	Aerospace Craft 15	High Value, Armoured (2)
Light Carrier	10	Aerospace Craft 6	High Value
Scout Ship Tender	3	—	Catapult
Battleship	15	Guns 8	High Value, Armoured (3)
Heavy Cruiser	10	Guns 4	Catapult, Armoured (2)
Light Cruiser	6	Guns 2	Catapult
Destroyer	3	Guns 1	Deep-Stealth Charges
Stealth Frigate	6	Guns 1	Stealth Frigate, Weak AA Defences
Auxiliary	2	—	Weak AA Defences
Fighter Squadron	1	CAP 1	Squadron
Bomber Squadron	1	Strike 1	Squadron

Special Rules

- **ARMoured (X):** When the Attacker assigns Confirmed Hits to a ship with the Armoured (X) rule, it must be assigned X hits or ignores all assigned hits. A single Unconfirmed Hit sinks this ship.
- **CATAPULT:** May launch Recon Aero Actions without an Aero Group card (unless in an area of Poor Visibility).
- **DEEP-STEALTH CHARGES:** In Gun Battles, rolls of 5 are Confirmed Hits, assigned to Stealth Frigates (Unconfirmed if all Stealth Frigates are sunk).
- **HIGH VALUE:** These ships are of high value to the fleet and may be treated differently in scenario victory conditions.
- **STEALTH FRIGATE:** At the start of the Command Phase, any TF that contains only Stealth Frigates automatically becomes hidden. During Gun Battles, roll Stealth Frigate attack dice separately: rolls of 4 are Unconfirmed Hits, rolls of 5 or 6 are Confirmed Hits.
- **WEAK AA DEFENCES:** A ship with this rule contributes no AA dice during the AA Step of an Aero Action.

FACTION A – FLEET MODIFICATIONS

COMMON (EARLY & LATE)

- **ENEMY CODES:** This Fleet receives one additional Command Chip each round.
- **INCREASED AEROSPACE CRAFT CAPACITY:** Carriers in this fleet gain +3 to their Aerospace Craft value.

EARLY WAR ONLY

- **UNRELIABLE TORPEDOES:** When rolling Strike dice, the attacker must re-roll all its Confirmed Hits once.

LATE WAR ONLY

- **COORDINATED STRIKES:** During Aero Actions, may discard a black Aero Group card from another TF in the same Stack to add its Strike value when amassing Strike dice.
- **MOBILE FORCE DOCTRINE:** No limit on the number of Fleet Carriers in any Task Force.

FACTION B – FLEET MODIFICATIONS

COMMON (EARLY & LATE)

- **COORDINATED STRIKES:** During Aero Actions, may discard a black Aero Group card from another TF in the same Stack to add its Strike value when amassing Strike dice.
- **EXTENDED AEROSPACE CRAFT RANGE:** This Fleet has a Strike Range of 24" and a Recon Range of 48".
- **INEFFECTIVE AA:** *Disadvantageous.* After rolling AA dice for this Fleet, discard half of the hits (keeping an odd hit).

EARLY WAR ONLY

- **MOBILE FORCE DOCTRINE:** No limit on the number of Fleet Carriers in any Task Force.
- **SEASONED PILOTS:** When rolling Strike dice, rolls of 3 also count as Unconfirmed Hits. When rolling Intercept dice, rolls of 4+ are hits.
- **SUPERIOR FIGHTERS:** When this fleet rolls Intercept dice, they may re-roll any misses once.

LATE WAR ONLY

- **AEROSPACE CRAFT SHORTAGE:** *Disadvantageous.* All ships in this Fleet halve their Aerospace Craft values, rounding up.
- **ROOKIE PILOTS:** *Disadvantageous.* When this fleet rolls Strike dice, only rolls of 5 count as Unconfirmed Hits. When this fleet rolls Interception dice, only rolls of 6 count as hits.

Setting Up A Game

1. **CHOOSE A SCENARIO:** From the Historical Scenarios, or generate one with Arcade Mode.
2. **AGREE A BATTLE SCALE:** Choose (S), from 2 (skirmish) to 7 (huge engagement).
3. **BUILD FLEETS:** Per the Fleet Building rules ($\leq 100 \times (S)$ points each).
4. **PREPARE TASK FORCE SHEETS:** One per Task Force, for both players.
5. **DRAW GAMBITS:** Shuffle Gambit chips and draw (S) at random.
6. **ORGANISE CHIPS INTO STACKS:** One chip per TF + your Gambits + $3 \times (S)$ Blank Chips, into up to (S)+2 Stacks, each on a Base Chip.
7. **GATHER AERO GROUP CARDS:** Split a deck of cards by colour (1 red + 1 black suit each). Gather Flagship miniatures.
8. **FOLLOW SCENARIO SETUP RULES:** Table layout, terrain, deployment & first player are set by the scenario.
